### Synergistic Activities

**Symposium "Biology at the Cusp: Teeth as a Model Phenotype for Integrating Developmental Genomics, Biomechanics, and Ecology"**: I co-organized with Gareth Fraser this symposium at the Society for Comparative and Integrative Biology meeting in Austin in 2020 that discussed the integrative biology of teeth.

**Etnier Ichthyological Collection**: As curator of this fish collection, I contributed to the growth and maintenance of this natural history collection that governmental and non-governmental groups in the Southeastern United States utilize extensively. During this time, we completed the digitization of the collection and made it web-accessible. Additionally, I oversaw the creation and building of a \$50,000 endowment for this collection to contribute to its long-term maintenance and improvement.

**Symposium "The Molecular Basis of Convergent Evolution"**: I co-organized with Marie Semon and Yoel Stuart a symposium at the Second Joint Conference on Evolutionary Biology in Montpellier, France in 2018. This symposium centered around the genomic underpinnings of the gains and loss of adaptive traits.

**Nimbios Suction Feeding Working Group**: In collaboration with Peter Wainwright and Steven Day, I helped to organize a working group at the U.S. National Institute of Mathematical and Biological Sciences that examined the biomechanics of the suction feeding apparatus in vertebrates.

**Symposium "Genomics and vertebrate adaptive radiation: a celebration of the first cichlid genome"**: I co-organized with Suzy Renn a symposium at the Society for Comparative and Integrative Biology meeting in Boston in 2010 that addressed the promise and utility of the first fully sequenced cichlid genome.
